PROJECT:

- **Hospital Management system using HTML, CSS, BOOTSTRAP, PHP**
  - It is web based hospital management system and is the Ultimate solution for managing single or multiple: Hospital Diagnostic Center Clinic Nursing Home. Every essential part of a hospital is included in the system. Different user group can access this system. Admin can see others activities. Doctor can take control of patient information.

- **Women & Children Safety System (Final year Project)**

  - In case victim is unable to reach the phone the app running as the service in wearable will trigger the system and send the alert to all the trusted contacts and emergency management agencies. At the press of a button/some speech keyword/shaking the device the program will send a message to all of your emergency contacts. The program also sends an alert to emergency management agencies where central emergency control management system will be deployed.

- **Student Management System**

  - A Django Student Management System Project has 3 User Interfaces, The Admin Side, which can see overall summary charts of students performance, staffs performances, courses, subjects, leave, etc. Staff/Teacher Side, can see the overall summary charts related to their students, their subjects, leave status, etc.and Student Side, that can see the overall summary charts related to their attendance, their subjects, leave status, etc.

- **EBook App**

  - This is an EBook flutter application where you can show all types of books in one place to readers. This will show Book list, Book details like Book Name, Author name, Price, Free or Paid. If the Free book it will load the PDF inside application then readers can read the book. This Application developed with Flutter as Frontend and PHP as Backend.

- **Ecommerce App**
  - On our E-commerce app UI has two pages one for the product page which has a horizontal list of categories then a list of our products. Then on the details page, it shows the price and short description of the product with the Buy Now button. The best part of our E-commerce app is, each product has its own color which looks great.
